

sculptra[®]aesthetic
injectable poly-L-lactic acid

Summer is the Season for Sculptra[®]Aesthetic

Summertime is prime time for vacation, relaxation and rejuvenation. That's why I'm delighted to present this "Living Easy" offer for Sculptra[®]Aesthetic, the facial injectable option that has shown remarkable results in patients and can last up to 25 months.

Here's what could make Sculptra Aesthetic the right option for you:

- It works gradually to replace lost collagen – a key cause of wrinkles, lines and folds
- It can give subtle yet noticeable results that can last up to 25 months
- Treatment sessions are, on the average, just 3 injections over a few months

Individual results and treatment regimens may vary

See this remarkable transformation over time:

Before treatment

injectable poly-L-lactic acid

ANTI-AGE FOR THE MODERN AGE

Indication and Important Safety Information: Sculptra[®] Aesthetic is intended for use in people with healthy immune systems as a one time treatment regimen of up to 4 injection sessions that are scheduled about 3 weeks apart for correction of shallow to deep nasolabial fold contour deficiencies and other facial wrinkles.

You should not use Sculptra Aesthetic if you are allergic to any ingredient of the product or have a history of keloid formation or hypertrophic scarring. It should not be injected while you have an active skin infection or inflammation in the treatment area and should not be injected into the red area of the lip. Side effects may include injection site discomfort, redness, bruising, bleeding, itching and swelling. Other side effects may include small lumps under the skin that are sometimes noticeable when pressing on the treated area. Larger lumps, some with delayed onset with or without inflammation or skin discoloration, have also been reported.
